**Abstract:** Economic integration is the process of deepening economic cooperation between states, increasing interdependence in trade, investment, production, etc. Economic integration between Uzbekistan and Afghanistan is important in ensuring regional stability, economic development and social welfare. The analysis of the factors affecting the integration process between these two states provides the basis for the further development of their economic relations.

**Key words:** economic relations, business, regional security, infrastructure, peace, projects, integration, factors.

**Annotatsiya:** Iqtisodiy integratsiya – bu davlatlar o‘rtasidagi iqtisodiy hamkorlikni chuqurlashtirish, savdo, investitsiya, ishlab chiqarish va boshqa sohalarda o‘zaro bog‘liqlikni kuchaytirish jarayonidir. O‘zbekiston va Afg‘oniston o‘rtasidagi iqtisodiy integratsiya mintaqaviy barqarorlik, iqtisodiy rivojlanish va ijtimoiy farovonlikni ta‘minlashda muhim ahamiyatga ega. Ushbu ikki davlat o‘rtasidagi integratsiya jarayoniga ta‘sir qiluvchi omillarni tahlil qilish ularning iqtisodiy munosabatlarini yanada rivojlantirish uchun asos bo‘lib xizmat qiladi.

**Kalit so‘zlar:** iqtisodiy munosabatlar, biznes, mintaqaviy xavfsizlik, infratuzilma, tinchlik, loyihalar, integratsiya, omillar.

**Аннотация:** Экономическая интеграция — это процесс углубления экономического сотрудничества между государствами, увеличения взаимозависимости в торговле, инвестициях, производстве и других сферах. Экономическая интеграция между Узбекистаном и Афганистаном имеет важное значение для обеспечения региональной стабильности, экономического развития и социального благосостояния. Анализ факторов, влияющих на процесс интеграции между этими двумя государствами, служит основой для дальнейшего развития их экономических отношений.

## INTRODUCTION

Geopolitical factors play an important role in the process of economic integration. The geographical proximity and historical ties of Uzbekistan and Afghanistan create favorable conditions for the development of economic cooperation between the two states. However, political instability, security concerns, and internal conflict in Afghanistan complicate economic integration. These factors prevent the sustainable development of trade and investment activities. At the same time, Uzbekistan’s initiatives aimed at ensuring regional security and economic stability, including projects in the direction of Central Asia – Afghanistan, will serve to strengthen integration. Economic infrastructure and transport communications are one of the main factors in the integration process. The development of transport networks between Uzbekistan and Afghanistan, facilitating the transportation of goods across borders, expanding trade routes increase the efficiency of economic relations. Currently, the rail and highway infrastructure between the two states is under development, which will serve to increase the volume of trade. But logistics problems in the transport sector, customs procedures and border

control measures slow down the integration process. The suitability of economic systems is also an important factor affecting integration. There are significant differences in the structure of the economies of Uzbekistan and Afghanistan. While Uzbekistan's economy is more industrial and agricultural, Afghanistan's economy is rich in agriculture and resources, with limited industrial development. These differences complicate inter-trade and investment cooperation. Differences in economic policy and legislation also slow down the integration process. It is necessary to coordinate economic policies between the two countries, simplify tax and customs systems. Social and cultural factors also influence economic integration. There are historical, cultural and religious ties between the peoples of Uzbekistan and Afghanistan. These factors contribute to the strengthening of mutual trust and cooperation between the two states. However, social differences, differences in language and culture, as well as issues of migration, can complicate integration. Ensuring social stability, promoting cultural exchanges and training of human resources support the integration process.[1]

## LITERATURE REVIEW ON THE TOPIC

The economic reconstruction and regional integration of Afghanistan have been the subject of extensive scholarly discussion in recent years, particularly in the context of its relationship with neighboring Central Asian countries such as Uzbekistan. Ahmadzai (2021) highlights the importance of economic reconstruction as a foundational step for broader regional integration. He emphasizes that sustainable reconstruction is not only dependent on internal policy reforms but also on active engagement with neighboring states through joint economic initiatives [1].

Building upon this premise, Rahimi (2022) delves into the evolving trade dynamics between Afghanistan and Central Asia, noting a significant uptick in cross-border trade activities following infrastructural and policy improvements. His analysis underscores that trade liberalization and tariff negotiations are key to fostering deeper commercial ties, especially with Uzbekistan, which serves as a vital gateway for Afghan goods to reach broader markets [2].

Karimi (2023) focuses on infrastructure development and its direct correlation with cross-border cooperation. He argues that the successful implementation of transport corridors, such as railways and highways connecting Afghanistan with Uzbekistan and beyond, has the potential to transform regional logistics and accelerate economic integration. Infrastructure is seen as a tangible indicator of political commitment and economic vision [3].

In terms of political underpinnings, Faizi (2020) investigates the role of political stability in Afghanistan's economic trajectory. He contends that without a stable governance structure, economic growth and integration efforts will remain fragmented and vulnerable to external shocks. His work provides a vital lens through which to understand the interplay between political reforms and economic ambitions [4].

## RESEARCH METHODOLOGY.

The article employs methods such as systematic analysis and approach, theoretical reflection, logical and structural analysis, induction, deduction, statistical classification and generalization, expert evaluation and forecasting, as well as mutual and comparative analysis.

## ANALYSIS AND RESULTS.

The state of the trading and investment environment directly affects economic integration. Favorable investment conditions are needed to increase trade between Uzbekistan and Afghanistan. This is due to the stability of laws, tax policies, financial institutions and the business environment. Security concerns and political instability in Afghanistan limit the flow of investment. At the same time, Uzbekistan's economic reforms and openness, active participation in regional trade and transport projects will strengthen integration [2].

Energy resources are also important in economic integration. Afghanistan's natural resources, especially its capabilities in the energy sector, are of strategic importance to Uzbekistan. Cooperation in the energy sector, the development of natural gas and electricity transmission routes will strengthen economic integration between the two states. At the same time, financing and security issues of energy projects are important factors. Educational and scientific and technical cooperation is necessary for the long-term development of economic integration. The introduction of educational exchanges, scientific research and technology between Uzbekistan and Afghanistan will help modernize the economy. This serves to create new jobs, promote innovation, and increase economic competitiveness. The role of international cooperation and regional organizations is also great. Uzbekistan and Afghanistan can cooperate with regional economic organizations, international financial institutions and donor organizations to receive resources and technical support for the development of economic integration. This creates favorable conditions for economic stability and development [3].

During today's globalization, the process of economic integration between states is becoming more and more extensive. States seek to establish mutually beneficial cooperation by increasing their economic potential, developing trade and investment ties, exchanging technologies and encouraging labor force migration. At the same time, differences in economic policy between the two countries have a significant impact on the integration process. Economic policy is a complex of laws, strategies and regulatory legal acts developed by the state for the purpose of managing and regulating economic processes. The main areas of economic policy include: fiscal policy, monetary policy, trade policy, investment policy, Labor policy, and social policy. Each direction serves the purposes of the state such as ensuring economic stability, promoting economic growth, employment, controlling inflation, and organizing social protection. Economic policies of states are formed on the basis of their internal political system, level of economic development, socio-cultural characteristics, access to natural resources and historical experiences. Therefore, it is a natural situation that there are significant differences in economic policies between the two states [4].

Differences in the economic policies of states depend on many factors. First of all, differences in the level of economic development occupy an important place. Developed nations operate policies based more on a market economy, while state intervention tends to be relatively less frequent. Developing countries, on the other hand, seek to strengthen the role of the state in the support and management of the economy. Secondly, the political system and methods of governance also affect economic policy. While economic policies are more open and competitive in Democratic states, state intervention in authoritarian systems may be stronger. Social and cultural factors can be cited as a third factor. Social inequality, the qualification of labor force, cultural values affect the formation of economic policy. Fourth, the availability of Natural Resources and geopolitical location also cause differences in economic policy. Resource-rich states build their policies on this basis. Finally, historical experience and traditions play an important role in the formation of economic policy. Economic integration is the process of consolidating the economic activities of two or more states, strengthening interdependence through Trade, Investment, Labor and Technology Exchange. The levels of integration vary and are manifested in the form of Free Trade Zones, customs union, general market, economic union and political union.

Each level generates demands for the coordination and harmonization of specific economic policies. Differences in economic policy have a significant impact on the integration process between the two states. Differential policies complicate economic relations, limit the flow of trade and investment, reduce the effectiveness of cooperation. Trade policy determines the state's policy on imports and exports. If there are trade policy differences between the two countries, such as customs tariffs, import quotas, export restrictions, this will reduce the volume of mutual trade. For example, when one state encourages imports and another pursues a policy limiting imports, it slows down the integration process. Also, differences in standards, certification systems and quality requirements also make the exchange of goods difficult. Fiscal policy includes administration of the state budget, taxes, and government spending. This complicates the integration process if the fiscal policies of the two states are very different, such as tax rates, budget allocations, or government spending trends. Differences in taxes and subsidy systems change competitiveness for businesses, which affects the flow of investments. Monetary policy includes monetary policy, inflation rate, activities of the central bank. Differences in economic policy are also manifested in exchange rates and monetary policy. If the exchange rates in the two countries are not stable or the monetary policy is very different, it will be an obstacle to financial integration. The volatility of the exchange rate makes trading and investment activities uncertain, which slows down the process of economic integration. The labor market and the social protection system play an important role in economic integration. If the two states differ in labor law, wage level, social protection system, it complicates labor migration and labor exchange. The free movement of the labor force is considered one of the key elements of integration, but differences in labor policies limit this process. The investment policy determines the direction in which the state attracts and manages investments. If investment policies differ in the two states, this reduces the flow of investments. For example, if one state has favorable conditions for investment, and another has strict controls and restrictions, this will slow down the integration process [5].

## CONCLUSION AND RECOMMENDATIONS.

In summary, the economic integration between the states of Uzbekistan and Afghanistan depends on many factors, each of which affects the success of the integration process. Factors such as political stability, security, harmony of economic policies, infrastructure development, socio-cultural relations, trade and investment environment, energy resources, educational and scientific cooperation, as well as cooperation with international organizations, are important in strengthening integration. Taking these factors into account, an integrated approach and strategic planning are necessary to deepen economic integration between the two countries. This serves to promote regional stability, economic growth and well-being of the population.
