IQTISODIYOT & TARAQQIYOT

Ijtimoiy, iqtisodiy, texnologik, ilmiy, ommabop jurnal

Bosh muharrir:

Sharipov Kongiratbay Avezimbetovich

Elektron nashr. 2026-yil, mart.

Bosh muharrir o'rinbosari:

Karimov Norboy G'aniyevich

Muharrir:

Qurbonov Sherzod Ismatillayevich

Tahrir hay'ati:

Salimov Oqil Umrzoqovich, O'zbekiston Fanlar akademiyasi akademigi
Abduraxmanov Kalandar Xodjayevich, O'zbekiston Fanlar akademiyasi akademigi
Sharipov Kongiratbay Avezimbetovich, texnika fanlari doktori (DSc), professor
Rae Kvon Chung, Janubiy Koreya, TDIU faxriy professori, "Nobel" mukofoti laureati
Osman Mesten, Turkiya parlamenti a'zosi, Turkiya – O'zbekiston do'stlik jamiyati rahbari
Axmedov Durbek Kudratillayevich, iqtisodiyot fanlari doktori (DSc), professor
Axmedov Sayfullo Normatovich, iqtisodiyot fanlari doktori (DSc), professor
Abduraxmanova Gulnora Kalandarovna, iqtisodiyot fanlari doktori (DSc), professor
Kalonov Muxiddin Baxritdinovich, iqtisodiyot fanlari doktori (DSc), professor
Siddiqova Sadoqat G'afforovna, pedagogika fanlari bo'yicha falsafa doktori (PhD)
Xudoyqulov Sadirdin Karimovich, iqtisodiyot fanlari doktori (DSc), professor
Maxmudov Nosir, iqtisodiyot fanlari doktori (DSc), professor
Yuldashev Mutallib Ibragimovich, iqtisodiyot fanlari doktori (DSc), professor
Samadov Asqarjon Nishonovich, iqtisodiyot fanlari nomzodi, professor
Slizovskiy Dimitriy Yegorovich, texnika fanlari doktori (DSc), professor
Mustafakulov Sherzod Igamberdiyevich, iqtisodiyot fanlari doktori (DSc), professor
Axmedov Ikrom Akramovich, iqtisodiyot fanlari doktori (DSc), professor
Eshtayev Alisher Abdug'aniyevich, iqtisodiyot fanlari doktori (DSc), professor
Xajiyev Baxtiyor Dushaboyevich, iqtisodiyot fanlari doktori (DSc), professor
Hakimov Nazar Hakimovich, falsafa fanlari doktori (DSc), professor
Musayeva Shoirazimovna, iqtisodiyot fanlari bo'yicha falsafa doktori (PhD), professor
Ali Konak (Ali Ko'nak), iqtisodiyot fanlari doktori (DSc), professor (Turkiya)
Cham Tat Huei, falsafa fanlari doktori (PhD), professor (Malayziya)
Foziljonov Ibrohimjon Sotvoldix'ja o'g'li, iqtisodiyot fanlari bo'yicha falsafa doktori (PhD), dots.
Faxridinov Zafarjon Faxridin o'g'li, O'zb. Res. Bosh prokuraturasi HIJQKD boshqarma boshlig'i
Utayev Uktam Choriyevich, Anijon viloyati prokurorining o'rinbosari
Ochilov Farkhod, O'zb. Res. Bosh prokuraturasi IJQK Departamentining Namangan viloyati boshqarmasi boshlig'i
Buzrukxonov Sarvarxon Munavvarxonovich, iqtisodiyot fanlari nomzodi, dotsent
Axmedov Javohir Jamolovich, iqtisodiyot fanlari bo'yicha falsafa doktori (PhD)
Toxirov Jaloliddin Ochil o'g'li, texnika fanlari bo'yicha falsafa doktori (PhD), katta o'qituvchi
Bobobekov Ergash Abdumalikovich, iqtisodiyot fanlari bo'yicha falsafa doktori (PhD), v.b. dots.
Djudi Smetana, pedagogika fanlari nomzodi, dotsent (AQSH)
Krissi Lyuis, pedagogika fanlari nomzodi, dotsent (AQSH)
Glazova Marina Viktorovna, Iqtisodiyot fanlari doktori (Moskva)
Nosirova Nargiza Jamoliddin qizi, iqtisodiyot fanlari bo'yicha falsafa doktori (PhD), dotsent
Sevil Piriyeva Karaman, falsafa fanlari doktori (PhD) (Turkiya)
Mirzaliyev Sanjar Makhamatjon o'g'li, TDIU ITI departamenti rahbari
Ochilov Bobur Baxtiyor o'g'li, TDIU katta o'qituvchisi
Golisheva Yelena Vyacheslavovna, Iqtisodiyot fanlari nomzodi, dotsent.
Abdukarimova Dinara Rustamxonovna, bank-moliya akademiyasi professori, DSc., professor.
Ikramov Murod Akramovich, iqtisodiyot fanlari doktori (DSc), professor
Nazarova Ra'no Rustamovna, iqtisodiyot fanlari doktori (DSc), professor

IQTISODIYOT & TARAQQIYOT

Ijtimoiy, iqtisodiy, texnologik, ilmiy, ommabop jurnal

Editorial board:

Salimov Okil Umrzokovich, Academician of the Academy of Sciences of Uzbekistan
Abdurakhmanov Kalandar Khodjayevich, Academician of the Academy of Sciences of Uzbekistan
Sharipov Kongiratbay Avezimbetovich, Doctor of Technical Sciences (DSc), Professor
Rae Kwon Chung, South Korea, Honorary Professor at TSUE, Nobel Prize Laureate
Osman Mesten, Member of the Turkish Parliament, Head of the Turkey–Uzbekistan Friendship Society
Akhmedov Durbek Kudratillayevich, Doctor of Economic Sciences (DSc), Professor
Akhmedov Sayfullo Normatovich, Doctor of Economic Sciences (DSc), Professor
Abdurakhmanova Gulnora Kalandarovna, Doctor of Economic Sciences (DSc), Professor
Kalonov Mukhiddin Bakhridinovich, Doctor of Economic Sciences (DSc), Professor
Siddikova Sadokat Gafforovna, Doctor of Philosophy (PhD) in Pedagogical Sciences
Khudoykulov Sadirdin Karimovich, Doctor of Economic Sciences (DSc), Professor
Makhmudov Nosir, Doctor of Economic Sciences (DSc), Professor
Yuldashev Mutallib Ibragimovich, Doctor of Economic Sciences (DSc), Professor
Samadov Askarjon Nishonovich, Candidate of Economic Sciences, Professor
Slizovskiy Dmitriy Yegorovich, Doctor of Technical Sciences (DSc), Professor
Mustafakulov Sherzod Igamberdiyevich, Doctor of Economic Sciences (DSc), Professor
Akhmedov Ikrom Akramovich, Doctor of Economic Sciences (DSc), Professor
Eshtayev Alisher Abduganiyevich, Doctor of Economic Sciences (DSc), Professor
Khajiyev Bakhtiyor Dushaboyevich, Doctor of Economic Sciences (DSc), Professor
Khakimov Nazar Khakimovich, Doctor of Philosophy (DSc), Professor
Musayeva Shoira Azimovna, Doctor of Philosophy (PhD) in Economic Sciences, Professor
Ali Konak, Doctor of Economic Sciences (DSc), Professor (Turkey)
Cham Tat Huei, Doctor of Philosophy (PhD), Professor (Malaysia)
Foziljonov Ibrokhimjon Sotvoldikhoja ugli, Doctor of Philosophy (PhD) in Economic Sciences, Associate Professor
Fakhriddinov Zafarjon Fakhriddin ogli, Head of the DCEC under the Prosecutor General's Office of the Rep. of Uzb.
Utayev Uktam Choriyevich, Deputy Prosecutor of Anijan Region
Ochilov Farkhod, Head of the Namangan Regional Department of the Department of Internal Affairs of Rep. of Uzb.
Buzrukkhonov Sarvarkhon Munavvarkhonovich, Candidate of Economic Sciences, Associate Professor
Akhmedov Javokhir Jamolovich, Doctor of Philosophy (PhD) in Economic Sciences
Tokhirov Jaloliddin Ochil ugli, Doctor of Philosophy (PhD) in Technical Sciences, Senior Lecturer
Bobobekov Ergash Abdumalikovich, Doctor of Philosophy (PhD) in Economic Sciences, Acting Associate Professor
Judi Smetana, Candidate of Pedagogical Sciences, Associate Professor (USA)
Chrissy Lewis, Candidate of Pedagogical Sciences, Associate Professor (USA)
Glazova Marina Victorovna, Doctor of Sciences in Economics (Moscow)
Nosirova Nargiza Jamoliddin kizi, Doctor of Philosophy (PhD) in Economic Sciences, Associate Professor
Sevil Piriyeva Karaman, Doctor of Philosophy (PhD) (Turkey)
Mirzaliyev Sanjar Makhamatjon ugli, Head of the Department of Scientific Research and Innovations, TSUE
Ochilov Bobur Bakhtiyor ugli, Senior lecturer at TSUI
Golisheva Yelena Vyacheslavovna, Candidate of Economic Sciences, Associate Professor
Abdukarimova Dinara Rustamkhanovna, Doctor of Economic Sciences (DSc), Professor
Ikramov Murod Akramovich, Doctor of Economic Sciences (DSc), Professor
Nazarova Ra'no Rustamovna, Doctor of Economic Sciences (DSc), Professor

Ekspertlar kengashi:

Berkinov Bazarbay, iqtisodiyot fanlari doktori (DSc), professor
Po'latov Baxtiyor Alimovich, texnika fanlari doktori (DSc), professor
Aliyev Bekdavlat Aliyevich, falsafa fanlari doktori (DSc), professor
Isakov Janabay Yakubbayevich, iqtisodiyot fanlari doktori (DSc), professor
Xalikov Suyun Ravshanovich, iqtisodiyot fanlari nomzodi, dotsent
Rustamov Ilhomiddin, iqtisodiyot fanlari nomzodi, dotsent
Hakimov Ziyodulla Ahmadovich, iqtisodiyot fanlari doktori, dotsent
Kamilova Iroda Xusniddinovna, iqtisodiyot fanlari bo'yicha falsafa doktori (PhD)
G'afurov Doniyor Orifovich, pedagogika fanlari bo'yicha falsafa doktori (PhD)
Fayziyev Oybek Raximovich, iqtisodiyot fanlari bo'yicha falsafa doktori (PhD), dotsent
Tuxtabayev Jamshid Sharafetdinovich, iqtisodiyot fanlari bo'yicha falsafa doktori (PhD), dotsent
Xamidova Faridaxon Abdulkarim qizi, iqtisodiyot fanlari doktori, dotsent
Yaxshiboyeva Laylo Abdisattorovna, katta o'qituvchi
Babayeva Zuhra Yuldashevna, mustaqil tadqiqotchi
Komilova Nilufar Karshiboyevna, Geografiya fanlari doktori, professori
Umirzoqov Ja'sur Artiqboy o'g'li, iqtisodiyot fanlari doktori (DSc), dotsent
Zebo Kuldasheva, iqtisodiyot fanlari doktori (DSc), dotsent

Board of Experts:

Berkinov Bazarbay, Doctor of Economic Sciences (DSc), Professor
Pulatov Bakhtiyor Alimovich, Doctor of Technical Sciences (DSc), Professor
Aliyev Bekdavlat Aliyevich, Doctor of Philosophy (DSc), Professor
Isakov Janabay Yakubbayevich, Doctor of Economic Sciences (DSc), Professor
Khalikov Suyun Ravshanovich, Candidate of Economic Sciences, Associate Professor
Rustamov Ilhomiddin, Candidate of Economic Sciences, Associate Professor
Khakimov Ziyodulla Akhmadovich, Doctor of Economic Sciences, Associate Professor
Kamilova Iroda Xusniddinovna, Doctor of Philosophy (PhD) in Economics
Gafurov Doniyor Orifovich, Doctor of Philosophy (PhD) in Pedagogy
Fayziyev Oybek Raximovich, Doctor of Philosophy (PhD) in Economics, Associate Professor
Tukhtabayev Jamshid Sharafetdinovich, Doctor of Philosophy (PhD) in Economics, Associate Professor
Khamidova Faridaxon Abdulkarimovna, Doctor of Economic Sciences, Associate Professor
Yakhshiboyeva Laylo Abdisattorovna, Senior Lecturer
Babayeva Zuhra Yuldashevna, Independent Researcher
Komilova Nilufar Karshiboyevna, Doctor of Geographical Sciences, Professor
Umirzokov Jasur Artiqboy ugli, Doctor of Economic Sciences (DSc), Associate Professor
Zebo Kuldasheva, Doctor of Economic Sciences (DSc), Associate Professor

METHODOLOGICAL MODELS FOR THE DEVELOPMENT OF THE DIGITAL ECONOMY IN REGIONS

Majidova Sanobar Daminovna

Independent Researcher at the Higher School of Business and Entrepreneurship under the Cabinet of Ministers of the Republic of Uzbekistan.

ORCID:0009-0001-4485-5233

sanobardaminovna@gmail.com

Abstract. This article is devoted to the theoretical and methodological foundations, models, and forms of developing the digital economy in regions, as well as its structural components and potential areas of application. Furthermore, the article presents practical proposals and recommendations for the effective use of such concepts as “Regional Digital Transformation,” “Smart Region,” and “Digital Region.”

Key words: digital transformation, digital technologies, digital economy, regional digital transformation, smart region, digital region, big data systems, artificial intelligence.

Annotatsiya. Mazkur maqola hududlarda raqamli iqtisodiyotni rivojlantirishning nazariy-metodologik asoslari, modellari va shakllari, shuningdek, uning tarkibiy qismlari va amaliy qo'llanish imkoniyatlariga bag'ishlangan. Shuningdek, maqolada “hududiy raqamli transformatsiya”, “aqli hudud” va “raqamli hudud” kabi tushunchalardan samarali foydalanish bo'yicha amaliy taklif va tavsiyalar ishlab chiqilgan.

Kalit so'zlar: raqamli transformatsiya, raqamli texnologiyalar, raqamli iqtisodiyot, hududiy raqamli transformatsiya, aqli hudud, raqamli hudud, katta ma'lumotlar tizimlari, sun'iy intellekt.

Аннотация. Данная статья посвящена теоретико-методологическим основам, моделям и формам развития цифровой экономики в регионах, а также её структурным элементам и перспективным направлениям применения. Кроме того, в статье представлены практические предложения и рекомендации по эффективному использованию таких концепций, как «региональная цифровая трансформация», «умный регион» и «цифровой регион».

Ключевые слова: цифровая трансформация, цифровые технологии, цифровая экономика, региональная цифровая трансформация, умный регион, цифровой регион, системы больших данных, искусственный интеллект.

INTRODUCTION

Today, digital technologies have become a critical factor in economic development, serving as a key instrument for promoting growth not only at the national level but also at the regional level. In particular, the implementation of the digital economy in regions contributes to increasing the efficiency of regional economic systems, ensuring the rational use of resources, and optimizing management processes. The essence of developing the digital economy in regions lies in restructuring regional economic systems through digital transformation and directing them toward innovative development pathways.

According to the World Bank, the development of the digital economy at the regional level can increase a country's gross domestic product by an average of 1.5–2% per year [1]. This, in turn, strengthens the economic stability and investment attractiveness of regions, while also advancing the industrial, agricultural, and service sectors to a new stage of development.

LITERATURE REVIEW

The concept of regional economics as a scientific discipline emerged within classical economic thought, where scholars such as Alfred Marshall, Walter Christaller, Johann Heinrich von Thünen, and August Lösch developed foundational spatial economic theories. Their work established the theoretical basis for key constructs, including economic specialization, agglomeration effects, and the role of regional resources and location factors [2,3,4,5,6].

Subsequently, Walter Isard advanced regional economics by analyzing spatial organization through location, mobility, production, and interregional linkages [7]. Later contributions by Michael Porter emphasized industrial clusters as a driver of regional competitiveness [8], while Richard Florida highlighted the importance of human capital, creativity, and cultural-technological environments in regional development [9].

Since the early 2000s, the digital economy has increasingly been examined from a regional perspective alongside its global dimension. The theoretical foundations of regional digital development were shaped by scholars such as Edward Malecki, Manuel Castells, Boyd Cohen, and Julia Lane. In particular, Malecki's early assertion that internet infrastructure constitutes a critical driver of regional development anticipated subsequent transformations in the digital era [10]. Moreover, Castells' seminal work, *The Rise of the Network Society*, introduced the "network society" paradigm, which remains central to understanding contemporary digitally mediated regional systems [11].

In Uzbekistan, the digital economy and its regional implications have also attracted scholarly attention. Issues related to digital transformation and labor relations have been examined by S. Gulyamov and K. Abdurakhmonov, while organizational aspects have been explored by A. Kenjabayev, T. Qochqorov, and Z. Otaqo'ziyeva. The application of digital technologies has been analyzed by Dilshod Mamasoatov and Munis Abdullayev, whereas regional aspects of digital processes have been investigated by S. Khudoykulov and N. Gulyamova [12].

RESEARCH METHODOLOGY

The purpose of this study is to examine the necessity of developing the digital economy in regions, the evolutionary formation of the concepts of "regional economy" and "regional digital economy," the theories of digital development, and their practical applications. The research includes theoretical perspectives and methodological approaches for applying the digital economy in regions, as well as the effective use of concepts such as "regional digital transformation," "smart region," and "digital region."

The study employs a scientific approach, including logical analysis, comparison, statistical examination, and a review of diverse literature sources and research articles relevant to the topic.

ANALYSIS AND RESULTS

In general, the development of the digital economy in regions involves not only the introduction of new technologies but also a comprehensive transformation of economic systems, social relations, and governance processes into digital models. Integrating regions with complex climatic, geographic, and natural conditions with more developed regions is an important measure for enhancing competitiveness, fostering an innovative environment, and improving population well-being.

Through these digital initiatives, regions can achieve the following outcomes:

- Increased efficiency and responsiveness of economic activities;
- Enhanced potential for creating added value in industrial production and agriculture;
- Greater transparency and accessibility of public services for citizens;
- Generation of new employment opportunities through digital innovations;
- Development of human capital and a knowledge-based economy.

The distinctive features of the digital economy in regions are primarily reflected in its impact on regional development, its ability to optimize the allocation of economic resources, and its capacity to activate innovative potential. The digital economy enables the organization of economic processes on a new technological foundation and allows the coordination of production, service, and governance systems through digital platforms. As a result, regional economic activities are carried out with greater speed, transparency, and efficiency.

Another critical aspect of the digital economy in regions is its reliance on infrastructure. For the digital economy to develop fully, regions must possess modern information and communication systems, extensive internet networks, digital data centers, and information security systems. This infrastructure serves as the foundation for the development of digital services, online commerce, e-government, and education systems.

At the same time, the regional character of the digital economy is reflected in its dependence on human capital. Developing the digital economy in a region involves not only technical tools but also the preparation

of specialists with digital knowledge and skills. Human capital constitutes the primary factor driving the implementation of innovative solutions and digital transformation processes.

Another key feature of the digital economy in regions is the formation of innovation ecosystems. Collaboration among technology parks, innovation centers, startups, and research institutes ensures the sustainable growth of the digital economy. Such systems enable the creation of new jobs, the production of local innovative products, and their introduction to markets.

The analysis and effective resolution of economic processes rely primarily on theoretical foundations, scientific approaches, existing laws and regulations, methodological frameworks, and development models within the field.

When organizing regional economic development, measures should be developed on the basis of a comprehensive and scientifically grounded strategy that takes into account the economic potential, infrastructural capabilities, and unique characteristics of each region, relying on both theoretical and practical approaches. Therefore, the development of the digital economy in regions should be carried out by considering regional specificities and implementing strategies grounded in both theoretical and practical frameworks.

The study of the development processes of the digital economy in regions, from both theoretical and practical perspectives, is grounded in the methodological alignment of regional development and digital transformation theories. Most international literature justifies the development of the digital economy in regions based on the following theoretical and methodological aspects:

1. Theoretical and methodological foundations related to regional economic development [13]: The economic growth of a region is linked to its innovative potential and the efficiency of resource allocation. According to this theory, the development of digital infrastructure helps centralize economic activity within the region and accelerate the implementation of innovations.

2. Theoretical and methodological foundations related to digital transformation [14]: This approach emphasizes that digital technologies influence not only economic systems but also social and institutional structures. In this context, the development of the digital economy in regions involves not only economic modeling but also the restructuring of social relations and governance systems.

3. Theoretical and methodological foundations related to the formation and development of innovation systems [15]: The regional digital economy enhances the interconnections among innovation, education, and entrepreneurship. This, in turn, increases the production capacity of the region while creating new competitive advantages.

The theoretical and methodological foundations of regional development focus on achieving sustainable growth through the effective utilization of a region's natural, economic, and social resources. Within this process, digital transformations act as a key driving force, enhancing competitiveness by digitizing economic activity, implementing information technologies, and optimizing governance processes.

At the same time, the methods for forming and developing innovation systems are aimed at strengthening the interconnected cooperation among science, education, and production sectors. This integration ensures economic growth in regions based on new technologies, digital solutions, and scientific achievements.

Furthermore, the effective convergence of digital transformation and innovation systems in supporting regional development enables the full realization of economic potential, the creation of new employment opportunities, the promotion of social stability, and the establishment of a modern regional governance model grounded in the digital economy.

In general, both academic research and international practice utilize several interconnected models for the development of regional digital economies, grounded in theoretical and methodological foundations. These models are mutually interrelated and form the basis of contemporary regional and national development strategies (Figure 1). In particular, they include:

- "Innovation-Driven Development" model: This model ensures economic growth through new ideas and technological advancements.
- "Cognitive Economy" model: This model emphasizes the role of human capital and knowledge potential in driving economic processes.
- "Smart Region" model: This model facilitates effective governance through digital infrastructure.
- "Inclusive Digital Development" model: This model promotes development by providing digital opportunities to all segments of the population.

Methodologically, the development of any socio-economic process can utilize various forms and approaches. Implementing the development of the digital economy in regions through diverse forms and modalities is especially relevant in today's global economic environment (Figure 1).

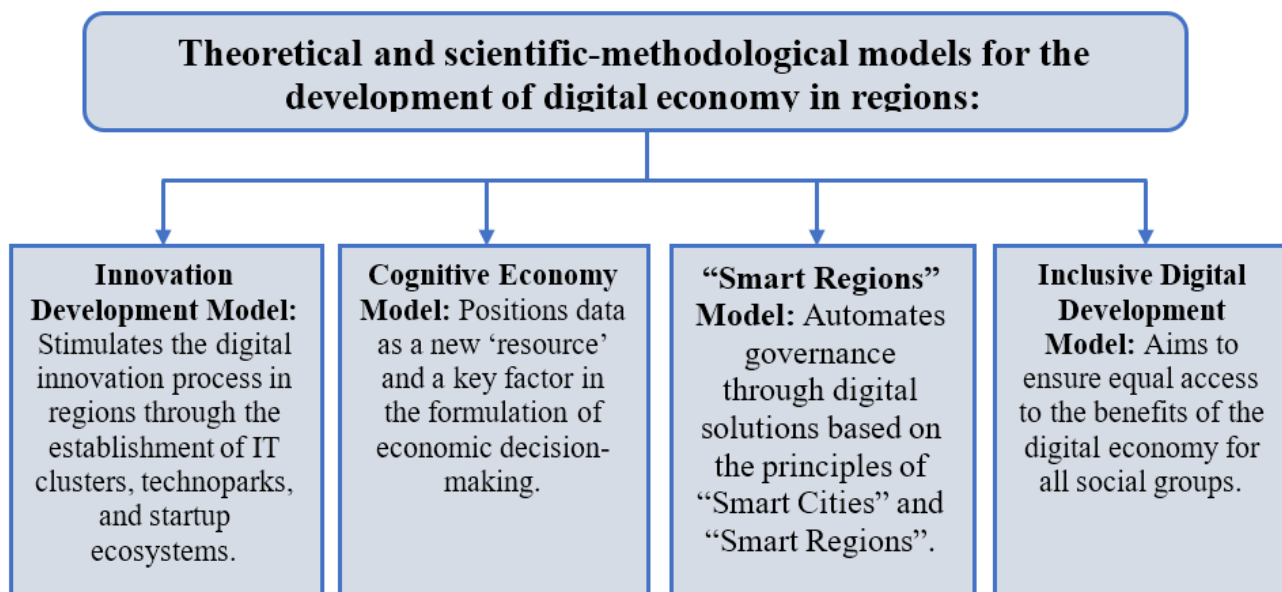

Figure 1. Theoretical and Methodological Models for the Development of the Digital Economy in Regions¹

This is because digital technologies create different opportunities across sectors, and their implementation in each sector depends on specific requirements, infrastructure, and the level of human capital. For instance, in the industrial sector, digital development primarily occurs through automation, artificial intelligence, and smart manufacturing systems, whereas in the service sector, it is reflected through e-commerce, digital marketing, and mobile applications. Similarly, in public administration, the digital economy is advanced through e-government, electronic services, and open data platforms.

Hence, the significance of employing multiple forms and approaches lies in enabling the flexible and effective implementation of the digital economy across all sectors and regions. A uniform approach is not suitable for all sectors because each economic system may differ in technological readiness, infrastructure, and human resource capacity. Therefore, implementing digital economy development through varied forms and modalities is not only theoretically justified but also practically essential, as it ensures economic efficiency, fosters innovation, and promotes sustainable regional development.

The forms of digital economy development represent a system of socio-economic processes that vary according to the directions and methods of utilizing digital technologies. These forms differ depending on which sector of the economy is being digitalized, to what extent, and by which methods. Therefore, scientifically classifying the forms of digital economy development allows for a deeper analysis of sector-specific characteristics, innovative trends, and economic outcomes. This approach is essential for systematically studying the overall concept of the digital economy and for scientifically informing government policies and strategic decisions.

The forms of regional digital economy development can be classified as follows:

1. Infrastructural form: Implemented through the deployment of internet and 5G networks, data centers, e-government systems, digital logistics, and smart city projects.
2. Innovational form: Encompasses the development of new digital products and services in cooperation with startups, technoparks, IT clusters, and universities.
3. Institutional form: Establishes a regulatory framework through regional digital strategies and digital economy agencies.
4. Social form: Aims to enhance human well-being by expanding access to digital services for the population, including taxation, healthcare, education, and social assistance.

Moreover, the forms of digital economy development are essential for assessing the level of digitalization at the national and regional scales, selecting priority directions, and scientifically allocating resources. This allows regional authorities and management bodies to accurately identify which sectors are advancing rapidly in digital reforms and which require additional support.

Therefore, the forms of digital economy development not only reinforce its theoretical and scientific foundation but also serve as a critical practical factor for promoting economic growth.

¹ Developed by the author based on the review of foreign literature.

Based on the above scholarly considerations, the development of the regional digital economy can be defined as an interconnected system of processes aimed at digitalizing the regional economy, establishing digital infrastructure, and ensuring innovative development through the implementation of data, modern digital technologies, and information-communication tools.

From a scientific standpoint, we propose the following conceptual definition: the process of regional digital economy development is a systematic and continuous activity aimed at enhancing regional competitiveness, stimulating economic growth, and positively influencing quality of life through the use of digital technologies, information systems, and innovative solutions across economic, social, and governance domains.

This systematic process includes structural elements related to infrastructure and its enabling factors. When these elements are implemented in a coordinated manner, they determine a region's competitiveness, economic growth, quality of life, and digital development potential. The core components of regional digital economy development consist of infrastructure, technologies, human capital, innovation environment, and monitoring systems.

Development of the Digital Economy in Regions: Structural Components. The development of the digital economy in regions is not limited to the implementation of technologies; it also encompasses the digital transformation of economic systems, governance, education, and social sectors. Its effectiveness is closely linked to a region's digital infrastructure, human capital, innovation environment, and monitoring systems. Thus, the structure of regional digital economy development consists of several interconnected components that serve to reorganize economic, social, and administrative processes based on digital technologies.

These components can be classified as follows:

1. Digital Infrastructure: This is an integrated set of technical, software, and information systems necessary for the operation of the digital economy and digital governance, including:

- Internet networks and high-speed communication systems, such as fiber-optic and 5G networks;
- Data centers and cloud services;
- Cybersecurity systems;
- Information and communication equipment and software tools.

2. Digital Governance and Digital Services: This component organizes the activities of state bodies and authorities on the basis of digital technologies, ensuring convenient, fast, and transparent services for citizens and businesses. It includes:

- E-government systems;
- Digitalization of public services, including online applications and tax systems;
- Regional databases and unified information platforms;
- Decision-making based on data analytics.

3. Digital Business and Economic Activity: This component organizes production, service provision, and market interactions across all sectors of the economy through digital technologies. It comprises:

- E-commerce and digital payment systems;
- Startup and innovation ecosystem companies;
- Digital production technologies, such as automation, IoT, and artificial intelligence;
- Digital service markets.

4. Human Capital and Digital Skills: One of the most important components of digital economy development, it encompasses the capacity of personnel to create, implement, and effectively use digital technologies in society. This includes:

- Programs to increase digital literacy;
- Training personnel in information technologies;
- Digital innovation initiatives in research and educational institutions;
- Centers for developing digital skills for youth and entrepreneurs.

5. Regional Innovation Ecosystems: This component includes the scientific, educational, economic, and organizational conditions necessary for promoting innovation, startups, and digital technologies in regions. Examples include:

- Smart City and Smart Region projects;
- Digital clusters and technology parks;
- Innovation laboratories and acceleration centers;
- Regional digital strategies and development programs.

6. Legislative and Institutional Environment: This includes the legal, organizational, and governance systems that ensure the implementation of the digital economy and innovative activities. It guarantees the sustainable and lawful development of digital transformation in regions. This component encompasses:

- Legal frameworks regulating the digital economy;
- Data protection and cybersecurity legislation;

- Mechanisms for improving investment and competition environments;
- Public-private partnership models.

The development of the digital economy in regions represents a new model of economic growth, achieved through reform-oriented initiatives across infrastructure, governance, business, human capital, innovation, and legislative domains. The primary objectives of this development process are to modernize regional economic systems through digital technologies, enhance production and service efficiency, and improve the standard of living of the population through a set of systematic measures.

The main objectives of developing the digital economy in regions include:

1. Creation and Modernization of Digital Infrastructure: Expanding high-speed internet networks, constructing data centers, and implementing digital government services form the foundational base of the regional digital economy.
2. Digitalization of Economic Activity: Introducing digital solutions, such as AI, IoT, and Big Data, in industrial, agricultural, and service sectors to enhance production efficiency and operational performance.
3. Development of Human Capital and Digital Literacy: Establishing IT education centers and startup incubators to raise the level of digital competencies among the population.
4. Support for Innovation Ecosystems and Startup Development: Facilitating the creation of new digital products through financing digital projects and strengthening regional IT cluster activities, thereby fostering a dynamic innovation environment.
5. Implementation of Digital Solutions in Governance: Developing e-government, digital administration, and open data platforms to ensure transparency, efficiency, and accountability in public administration.

The development of the digital economy in regions is implemented through the following forms:

1. Smart City and Smart Village Projects: Automating urban and rural management by applying IoT and sensor technologies in transportation systems, environmental management, utilities, and public safety.
2. E-Government and Digital Administration: Providing public services online, processing citizen requests through digital platforms, and reducing paper-based document circulation.
3. Industrial Digitalization (Industry 4.0): Applying robotics in production processes, digital twins, 3D printing, and artificial intelligence technologies to enhance industrial efficiency.
4. Digital Solutions in Agriculture: Utilizing drones and sensors to manage land and water resources, forecast crop yields, and optimize agrotechnical activities, thereby increasing agricultural productivity.
5. E-Commerce and Digital Service Market Development: Creating opportunities for regional entrepreneurs to sell local products through online platforms and implementing electronic payment systems.

The development of the digital economy in regions is a systematic, step-by-step process. It aims to effectively implement digital technologies across all sectors of economic activity, develop digital infrastructure, and enhance human capital capacity.

Stage 1: Preparation and Analysis. At this stage, the level of digital development in the region is assessed. This involves:

- Analyzing the economic, social, and technological potential of the region;
- Evaluating the state of information and communication infrastructure, internet coverage, and the level of digital services;
- Identifying challenges and needs related to the implementation of the digital economy.

Stage 2: Strategic Planning. At this stage, a regional strategy or roadmap for digital economy development is prepared. This includes:

- Defining the objectives and priority directions for digital economy development;
- Establishing cooperation mechanisms among the government, private sector, and educational institutions;
- Identifying the financial resources required for project implementation.

Stage 3: Infrastructure Creation and Modernization. This stage focuses on building and modernizing the essential infrastructure that forms the foundation of the digital economy. This involves:

- Expanding fiber-optic networks and 4G and 5G internet coverage;
- Establishing data centers and cloud computing systems;
- Strengthening information security and cybersecurity measures.

Stage 4: Implementation of Digital Technologies. At this stage, modern digital solutions are introduced across all sectors of the economy:

- In industrial production: smart manufacturing, robotics, and artificial intelligence;
- In agriculture: smart farming systems, sensors, and drones;
- In the service sector: e-commerce, online banking, and digital logistics;
- In public administration: e-government and online services for citizens.

Stage 5: Human Capital Development and Innovation Environment. This stage is a critical and integral part of regional digital economy development. Its main objective is to create a skilled workforce with digital competencies and foster an environment conducive to innovation. Measures include:

- Training and retraining programs for specialists in the digital economy;
- Supporting startups and innovation centers in information technologies;
- Establishing IT education programs and creative incubators for youth.

Stage 6: Monitoring and Performance Evaluation. This final stage serves as the control and evaluation phase, aiming to measure the effectiveness of implemented reforms, projects, and initiatives, analyze performance indicators, and identify directions for future development. Specifically:

- Establishing indicators for regional digital economy development;
- Analyzing project results and updating digital indices;
- Replicating best practices in other regions.

Throughout this process, the creation of digital infrastructure, including telecommunication networks, data centers, cybersecurity systems, and high-speed internet, is crucial. Based on this infrastructure, digital forms of economic activity, such as e-commerce, Industry 4.0, digital finance, smart agriculture, and other innovative solutions, are developed. Consequently, a favorable environment for the digital economy is established in regions, expanding economic opportunities and enabling integration into international markets.

CONCLUSION AND RECOMMENDATIONS

The development of the digital economy in regions represents one of the key directions of modern economic systems. Its implementation is carried out in close connection with theoretical and methodological foundations, development forms, and transformational processes. Theoretically, the development of the digital economy is based on models of innovation-driven growth, the cognitive economy, institutional frameworks, and synergistic approaches. These theories highlight the necessity of establishing regional digital infrastructure, efficiently managing information resources, and integrating economic activities into digital models.

Digital transformation serves as a driver for fundamentally renewing regional economic systems and reorganizing economic activities through digital technologies. It is not limited to the adoption of technology but also involves restructuring economic relationships, governance methods, and human capital capacity on a new foundation.

Thus, the development of the regional digital economy constitutes a comprehensive set of measures implemented on the basis of theoretical foundations, guided by scientific and methodological approaches, and integrated with transformational processes. Its effectiveness is determined by the level of development of digital infrastructure, the formation of an innovative environment, and the integration of economic processes into digital platforms.

The regional development of the digital economy, as a new model, is reflected in the achievement of economic growth, the advancement of national development, and the enhancement of societal well-being.
